Anchor device type B  
Type: ABS-Lock® T

### 16.2 Description

The anchor device of type ABS-Lock® T is used as a temporary single anchor point to protect a maximum of three people against falls from a height (Fig. 1).

The device is assembled to steel beams of a thickness between 8 mm and 16 mm and a width of 80 mm to 320 mm.

The anchor device consists of two beam clamps which are interconnected by means of a threaded rod (M16). At one end there is an edged sheet (t = 8 mm) into which a ring eyelet (M16) is screwed as the attachment element. This eyelet is used to connect the personal protective equipment against falls from a height worn by the user. Clamps are also used to fix the device to the building structure.

The anchor device is intended for loads from any direction and is made of corrosion-resistant steel and galvanized cast steel.
